Framed Canvas - artwork preparation guide

What to upload

Upload a high-quality JPG or PNG in the same orientation as the product you selected. The protected original is preserved. Use the table below as a target: 300 DPI is preferred, while 150 DPI is the minimum approval threshold for this collection.

Finished sizes and recommended image dimensions

Finished size	Shape	Preferred pixels (300 DPI)	Minimum pixels (150 DPI)
12 x 18 in	Portrait	3,600 x 5,400 px	1,800 x 2,700 px
16 x 20 in	Portrait	4,800 x 6,000 px	2,400 x 3,000 px
20 x 30 in	Portrait	6,000 x 9,000 px	3,000 x 4,500 px

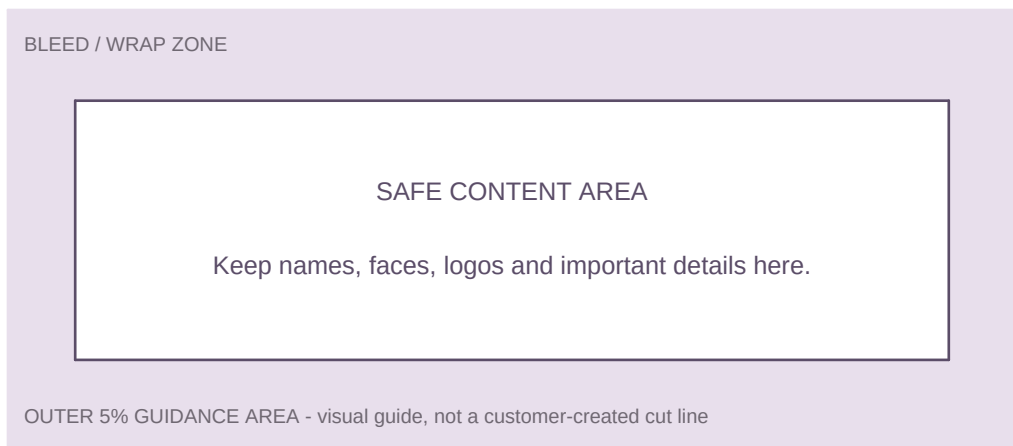

Material and presentation

Material: Standard canvas, 400 gsm, classic black frame with 19 mm stretcher bar

Edge treatment: Current production configuration uses a white canvas wrap inside the frame.

Bleed, crop and safe area

Do not add manual bleed, frame space or crop marks. Keep essential content away from the outer 5% guide. The approved editor placement is converted into the production-ready canvas surface.

How approval works

1. Select the exact product and size. 2. Upload the original. 3. Review the immediate resolution result. 4. Move, zoom or rotate the artwork. 5. Generate and approve the final placement. Only that approved version is used for production.

Important: the on-screen preview represents crop and placement. Screen color, texture and physical material appearance remain approximate.
