

D'Decorations

Photo Mug - artwork preparation guide

What to upload

Upload a high-quality JPG or PNG in the same orientation as the product you selected. The protected original is preserved. The table uses the exact print-area resolution returned by Prodigy's live product-details API for the active US production variant, verified 16 August 2026. D'Decorations checks effective DPI immediately after upload and warns when the selected crop may print softly.

Verified US product and print-area contract

Prodigi SKU	Finished size	Shape	Verified print area
GLOBAL-MUG-W	22.86 x 9.483 cm wrap	Landscape	2,670 x 1,110 px

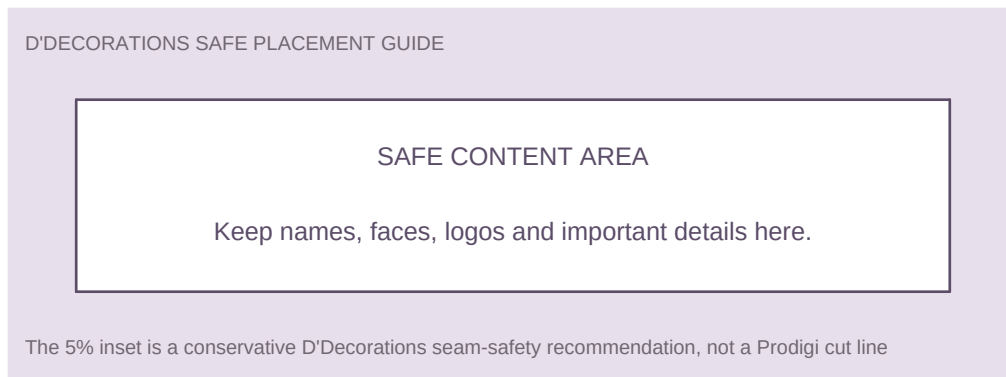

Material and presentation

Material: 11 oz white ceramic mug with a full-image wrap print area

Edge treatment: The editor shows the flat printable wrap; the finished product curves that artwork around the mug body.

Bleed, crop and safe area

Do not add crop marks or printer marks. The exact US print area is a 2670 x 1110 px flat wrap. Keep names, faces, logos and essential text inside the on-screen safe guide, especially away from the left and right seam edges.

How approval works

1. Select the exact product and size. 2. Upload the original. 3. Review the immediate resolution result. 4. Move, zoom or rotate the artwork. 5. Generate and approve the final placement. Only that approved version is used for production.

Important: the on-screen preview represents crop and placement. Screen color, texture and physical material appearance remain approximate.
